

These are out of order!

Gel-like fluid where the organelles are found

Ridged outer layer of a plant cell

Receives proteins & materials from the ER, packages them, & distributes them

Has passageways that carry proteins and other materials from one part of the cell to another

Stores food, water, wastes, and other materials

Assembles amino acids to create proteins

Function/Description

Controls what comes into and out of a cell; found in plant and animal cells

Uses chemicals to break down food and worn out cell parts

Produces the energy a cell needs to carry out its functions

Contains DNA, which controls the functions of the cell and production of proteins

Captures energy from the sunlight and uses it to produce food in a plant cells

Tiny strands inside the nucleus that contain the instructions for directing the cell's functions

Found inside the nucleus and produces ribosomes

I'll store anything,
(Hint: Vacuum Bags)

Make me something
sweet to eat

I'm a
"GOLden" packer.

I am a "mighty"
power house.

I'm a brick wall.

I'm a "tin" of
information.

I'm the
control center.

I make "some"
nice proteins.

I clean things up!
(Hint: Lysol)

I'm in "control" of
the number of "ribos".

Sail through
my plasma.

How can I remember it?

Members only
can come and go.

I'm a
transportER.
